

Leading Provider of Cable Management Solutions

Buna-N O-Ring

Cable Gland

Locking Nut

Are you in need of a simple, value-packed assembly solution?

Look no further than our Sealcon Cable Management Solutions Assembly. With a pre-assembled O-Ring, locking nut, and cable gland, it's designed for your convenience.

Ask about adding your logo.

WHAT ARE THE BENEFITS OF CABLE GLAND ASSEMBLY?

1) Reduction of Warehouse Space Requirements:

A Cable Gland Assembly Kit containing multiple items under a single SKU reduces the space needed for storage until use.

2) **Shipping Efficiency:** Shipping kits as a single unit can significantly reduce shipping costs.

3) **Cost Predictability:** Kitting promotes supply chain standardization, helping to make costs more predictable.

4) **Simplified Inventory Management:** With one SKU to track, inventory management becomes more straightforward and efficient.

5) **Enhanced Manufacturing Process:** Kitting improves manufacturing efficiency, lowers costs, and allows for better forecasting.

6) **Customization:** Get your own part number, and ask about adding your logo on the part for a customized solution.

Your Kitted Parts?

Your Kitted Part

All Together in a Bag

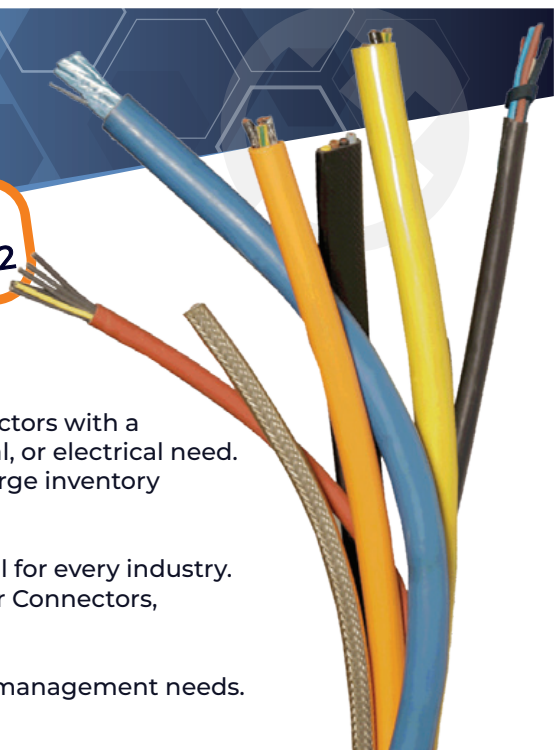

Kitting is ideal for any OEM or distributor looking to optimize their supply chain. This approach frees up storage space, reduces costs, and increases flexibility and

core competencies. Outsource your cable management kitting process to Sealcon. We offer high-quality cable management products and experienced service.
